

WATER and WASTEWATER

PRC's water and wastewater staff is committed to protecting and preserving the water supply and directing wastewater to appropriate treatment sites. The group specializes in long-term system planning, design, construction, and operation of water supply, treatment storage, and collection & distribution systems. From line extensions to master planning, PRC treats every project as a unique challenge with resource conservation as the goal.

PLANNING

- Grant Writing and Funding
- Application Assistance
- Utility Master Planning
- Replacement / Rehabilitation Phasing
- Public Involvement
- Well Permitting
- Wastewater Treatment

PROJECT MANAGEMENT

- Contract Administration
- Consultant Management
- Grant Management
- Project Scheduling
